Experience

Caxy Interactive, 2023 - Present

- Developed and maintained software applications for clients across various industries, focusing on user experience, performance, scalability, and seamless integration with third-party services. Worked on front-end and back-end solutions; delivering user-friendly applications.
- Worked with small and large teams leveraging technologies including by not limited to: JavaScript, TypeScript, React, Nest.js, PHP, Symfony, Scala, Play Framework, GraphQL, and MySQL.
- Some key projects:
  - Sales Portal for Fiber Optic Provider: Worked on a web-based quote and sales order management tool integrated with NetSuite for improved efficiency.
  - Financial Wellness Platform: Developed a comprehensive suite of financial planning tools and interactive learning experiences.
  - Casino Gaming Platform: Contributed to multiple front-end applications and back-end micro-services for player management and online gaming.

Creative Safety Supply, 2021 - 2023

- Led a team of 4 developers in building React applications across multiple eCommerce sites and internal platforms.
- Developed and deployed full-stack web applications using JavaScript, TypeScript, React, Next.js, Node.js, and SQL databases.
- Implemented web servers and APIs utilizing Node.js and Express.js.
- Utilized cloud hosting platforms such as AWS, Heroku, and GitHub to deploy applications and set up CI/CD pipelines.

Freelance Web Development, 2020 - 2021

- Built and deployed websites and full-stack web applications using JavaScript, React, and various tools and libraries.
- Developed custom content management systems.
- Collaborated closely with clients to meet project specifications and deadlines.
- Managed hosting services and deployments for client projects.
